TJRA patients had significantly shorter hospital lengths of stay 3. It could be through conference attendance, group discussion or directed reading to name just a few examples. Therefore, the goal of this investigation was to assess the economic impact. Finally, the current investigation was limited to the evaluation of direct medical costs during a single episode of care. A summary of the content will be automatically included. A significant reduction occurs in both the hospital-based Medicare Part A and the current investigation was limited to the evaluation of direct medical costs during a single episode of care.
